

It's among the leaves  
on the horizons  
it's moving  
it's everywhere  
between spaces  
in every emotion  
it's life  
never the same  
always indispensable  
this is what inspires us  
and what we want to  
inspire  
a new quality  
of air  
and of life

# The Air Factory.

## A future that began long ago.

Falmec was born in 1981 as a small artisanal business and has grown today to be one of Italy's centres of excellence and a leading international player in the market. An "air factory" with a state-of-the-art approach, an experience in the design and manufacture of extraction solutions, developed through years of experience. A team, a family, bringing together the experience and skill of different generations, contributing with their energy, creativity and talent to create products and solutions that improve people's daily lives.

## A product created through genuine Italian quality and culture.

A completely integrated production organization, from initial design up to the finished product. Our multi-phase process takes place entirely on site at our company headquarters in Vittorio Veneto, just outside Venice. Each Falmec hood is developed, designed and built entirely in Vittorio Veneto, a town located in one of the most important Italian production districts, where a true industrial, steel-specialized culture blends with the ingenuity and craftsmanship skills rooted in this territory. The true value of "Made in Italy" is embodied in a real product culture: an absolute guarantee of quality that is found in every product and that starts from design, through the care of detail and the perfection in the making, to end with the choice of the finest materials.

## Why Falmecc?

### Solutions for a new quality of life at home.

Thanks to our extensive experience in the field of kitchen extraction systems, to the development of advanced technologies and to continuous investment on innovation, Falmecc continues to transform customers' needs for wellbeing and domestic air quality into products and solutions that improve daily life and home comfort. All senses are soothed: smell, through the efficiency of our hoods and unique air treatment solutions; sight and touch through sophisticated design and high-quality materials; hearing through the extreme quietness.

Life inspired.

## Quality of life: now you can breathe it.

### Technology for a better air.

Falmec offers unique, patented solutions for maximum efficiency and performance. Whether used in extracting or recirculating mode, Falmec cooker hoods satisfy one of our primal needs: breathing. Deep research, design accuracy and the use of unique, exclusive solutions allow total efficiency in operating performance, to guarantee the best air in every environment.

### Filtering Innovation.

Our focus on air quality and environment matters has led us to develop unique technologies that guarantee all the benefits of filtering solutions without compromising on suction performance and air purity.

## Quality of life: now you can hear it.

### NRS®: a quiet kitchen.

True relaxation and peace of mind are only possible when we're free of unpleasant noise. Noise pollution is acknowledged as one of the principle sources of physical and psychological stress. Falmecc has developed a solution that cancels out hood noise using innovative NRS® (Noise Reduction System) technology.

The result are products that combine superior performance with an incredible improvement in home comfort. In addition to statistics, which demonstrate noise reduction of almost 90%, we can confirm not only that you won't hear your hood any more, but that you'll experience greater quality of life in your kitchen.

## Quality of life: now you can see it.

### Design and shape.

Elegance, style, ergonomics, functionality, integrated in a perfect balance. Design for a better living, in any environment, matching the principles of minimalism and essentiality with aesthetic proposals of strong character and emotional impact. Design means thinking about the object in everyday use, considering the aesthetic value, but without compromises in functionality.

## Quality of life: now you can touch it.

### Substance.

Falmec's obsessive pursuit of quality shows in every product, detail, perfect finishes and in the selection of the finest materials. Quality that you'll touch every day for many years to come: each product is designed to stand the test of time, thanks to the selection of reliable components and long-standing materials.

### High quality stainless steel.

Falmec selects and uses AISI 304 stainless steel alloyed with 18% chrome and 8% nickel. Hygienic, easy-to-clean and extremely resistant to corrosion, as demonstrated by salt spray laboratory tests, AISI 304 is the best material there is when it comes to making hoods.

## Quality of life: now you can taste it.

### Cooking with Falmec.

Food, in Italy, means tradition and daily value, which Falmec transfers into its products, offering solutions that express this culture with taste, not just at the table. Falmec offers a range of products designed to enhance the experience of cooking and being together in the kitchen. Cooking and extraction are combined in unique solutions that allow to express in the kitchen, in every way.

### Integrated Cooking Systems.

Falmec has designed and created a range of products that integrate cooking and extraction in a single body, inspired by a concept of total minimalism, ergonomics, design and high efficiency. Integrated systems that incorporate the experience by Falmec in extraction, together with cutting-edge cooking technologies, creating products in tune with contemporary trends and lifestyles. Equipped efficient and extremely silent motors, Falmec worktop solutions guarantee excellent operating performance. In filtering mode, the use of exclusive Carbon.Zeo technology allows an excellent elimination of odors and a considerable reduction in the humidity of the cooking vapours.

### Dialogue System.

The different functions of the hood can be directly controlled from the hob, using the integrated touch control feature. Communication between the hob and the hood happens via radio waves, and requires no additional receivers to be installed in the hood. The Dialogue System is compatible with all Falmec hoods featuring remote control.
